### 5 things you may not know

#### Energy-Efficient LED Lighting:

These displays often use LED lights, consuming up to 80% less energy than traditional lighting, making them cost-effective and eco-friendly.

#### Seamless Look with SEG Graphics:

Using Silicone Edge Graphics (SEG), the fabric edges tuck into an aluminium frame, creating a sleek, frameless design that enhances branding.

#### Tool-Free Setup:

Many illuminated displays offer modular, tool-free assembly, allowing for quick, hassle-free setup at events.

#### Double-Sided Printing:

Unlike standard displays, these units often feature double-sided printing, maximizing visibility from multiple angles.

#### Compact Storage:

Despite their size, these displays collapse into a compact, wheeled case, making them easy to transport and store, even for international events.

A fabric tension portable event lightbox, known as a “lightbox in a bag,” is an innovative display designed for trade shows, exhibitions, and promotional events. It combines high-impact visuals with easy portability and quick assembly, making it an ideal branding solution.

#### HOW IT WORKS:

- **Lightweight Frame:** A sturdy, snap-together frame requires no tools for assembly.
- **Dye-Sublimated Fabric:** Stretchable fabric graphics wrap around the frame, diffusing light evenly for a stunning display.
- **LED Backlighting:** Energy-efficient LEDs illuminate the fabric, ensuring bright, attention-grabbing visuals.

#### KEY BENEFITS:

- **Ultra-Portable:** Packs neatly into a compact bag, often with wheels for effortless transport.
- **Easy Setup:** Intuitive assembly allows for a smooth, taut display in minutes.
- **Interchangeable Graphics:** Swap out fabric covers for different events, making it cost-effective.
- **Versatile Applications:** Perfect for trade shows, conferences, retail spaces, and brand activations.
- **Eye-Catching Presentation:** Vibrant, high-resolution graphics and uniform lighting enhance visibility in crowded environments.

A “lightbox in a bag” offers a professional, memorable display with minimal effort. Elevate your brand presence with this dynamic, travel-friendly solution!
